

Food supplement with Sucrosomial® Iron

BOTTLE 30ml + STICK OF 1,9g

Sideral® Gocce Int. is a food supplement with Sucrosomial® Iron (Sideral® r.m.), that is useful to cover dietary deficiencies or increased demand for said nutrient. **Iron contributes to normal cognitive development of children.** Sucrosomial® Iron can pass through the gastric environment intact and be directly absorbed in the intestine, thus avoiding eventual gastric disorders.

Indications: Sideral® Gocce Int. can be used in all cases of reduced dietary intake, increased demand for iron or low intestinal iron absorption.

Stick Ingredients: Sideral® r.m. – Sucrosomial® Iron Ferric pyrophosphate, sucrose esters of fatty acids, sunflower lecithin [tricalcium phosphate, rice flour], pregelatinized rice starch (*Oryza sativa*), maltodextrins. **Gluten Free.**

Bottle Ingredients: Demineralized water, sucrose, maltodextrins, flavour, preservatives: potassium sorbate and sodium benzoate; thickening agent: xanthan gum, acidity regulator: citric acid, emulsifier: sucrose esters of fatty acids. **Gluten Free.**

How to reconstitute: 1) Open the bottle. Be careful not to waste the cap. 2) Put the powder inside the bottle. 3) Put the cap on the bottle (do not use the dropper) and close it well, then let it sit for one minute. 4) Shake the bottle vigorously. 5) **Shake well before each use.**

Directions after reconstitution: Advised dosage is 10 drops a day equal to 1 ml of solution or as suggested by the doctor. Use the dropper included in the package. The product can be taken directly in the mouth, or dissolved in half a glass of water at room temperature, at any time of the day.

The presence of agglomerates immediately after reconstitution is due to the presence of anticaking agents inside the powder. It tends to disappear within 10 minutes after reconstitution. Therefore, we suggest to reconstitute the product a few minutes before use.

Mean Contents	Per daily dose (1ml)	%NRVs
Iron	7,00 mg	50%

%NRVs: Nutrient Reference Values Reg. 1169/2011

1 drop of product contains 0,7 mg of Sucrosomial® Iron.

Warnings: Store the product at room temperature (do not exceed 30°C) avoiding exposure to heat sources, sunlight and water. **After reconstitution store at 4° - 8°C. Use within one month of reconstitution.** Do not take more than the advised daily dosage. Keep out of the reach of children under 3 years of age. Food Supplements should not be considered as a replacement for a varied, balanced diet and a healthy lifestyle. **Use only after reconstitution.**

Iron is a mineral found in every living cell. It is the main component of haemoglobin in the red blood cells, playing an essential role in the body, as carrier of oxygen to all cells in the body. In some cases, when the diet is not sufficiently balanced and varied, to support the growth of children, correct supplementation of nutrients is necessary, including iron, a useful element for the cognitive development of children. Iron contained in Sideral® Gocce Int. is conveyed inside a sucrosomial® membrane that makes it highly bioavailable. This new sucrosomial® technology allows to improve gastric tolerability because the iron, protected within the h sucrosome® never comes in contact with gastrointestinal mucous tissue.

SHAKE WELL BEFORE USE
